## LINIAR SYSTEM Recessed Profile

### Description

The LINIAR SYSTEM is Apure's profile solution compatible with the MINUS TWO downlight fixture, as well as the ARTUS and ARTUS LAC fixtures. Available in 1 ft, 2 ft or 4 ft sections, the LINIAR SYSTEM is suitable for new construction drywall applications allowing for a sleek architectural alternative recessed in less than 25 mm (1").

### Construction

- Extruded aluminum profile
- Standard black powder coated finish (available in white)
- Includes screws for mounting to existing drywall
- Connector kit and screws included for extending the LINIAR profile.
- Available in 1 ft (305 mm), 2 ft (610 mm), 4 ft (1,219 mm)

### Installation Types

- Can accommodate 5/8" (15mm) drywall installation for new construction.
- The Minus series is not suitable for installation within steam rooms or saunas!

### Listings

- UL Listed, CE Conform
- Suitable for dry and damp locations

## DESCRIPTION

Each installation and design requires a unique profile composition. This configurator will provide the necessary information needed to order your LINIAR profile. This includes the desired length of the profile, and the amount of fixtures to be installed on the profile.

The 1ft profile features a single cutout in the center (5-1/2" away from each end) for a MINUS TWO or an ARTUS fixture. 4 Mounting screws are needed to install this section of the profile.

The 2ft profile features two cutouts spaced 11" apart. Each cut out is spaced 5-1/2" away from the end of the profile. 8 mounting screws are needed to install this section of the profile.

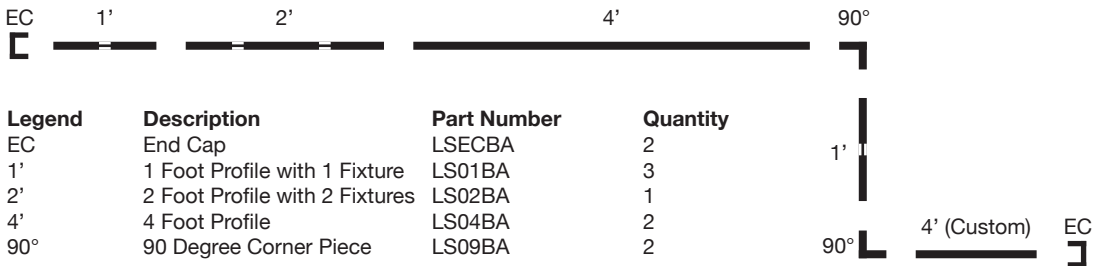

The 4ft profile is ideal for custom lengths and cutouts for ARTUS fixtures. This section is a blank slate where an ARTUS or an ARTUS LAC can be installed exactly where it needs to be. The MINUS TWO can not be installed on the 4ft profile.

This 90° corner piece allows for a continuous profile design. This 82mm profile does not have cutouts for lighting fixtures.

Profile Type (Black or White)	Part Number	Capacity of Fixtures	Quantity
1ft (305mm) Profile	LS01XX	1	_____
2ft (610mm) Profile	LS02XX	2	_____
